Introduction (M.J.)

This document is an overview of the Design level elements of our app and below are instructions on where to locate them. The design level class diagram contains datatypes and updated methods and attributes as well as corresponding pseudo code as a mockup of the app's code. The first cut sequence diagrams have been updated to include new entities and relationships and all the workings in between the user and the system. Finally, the statecharts have been included to depict all the states of the app based on our class diagram.

[Class Diagram](#) (C.G.)

Our design level class diagram is linked on GitHub.

[First Cut Sequence Diagrams](#) (R.F.)

Our first cut sequence diagrams are linked on GitHub.

[Statecharts](#) (M.J.)

Our statecharts are linked on GitHub.
